

COMMONWEALTH OF KENTUCKY  
BEFORE THE PUBLIC SERVICE COMMISSION

\* \* \* \*

In the Matter of:

THE APPLICATION OF )  
CINCINNATI BELL INC., )  
FOR AUTHORITY TO ) CASE NO. 8641  
ADJUST ITS RATES AND TO )  
CHANGE ITS TARIFFS )

O R D E R

Procedural Background

On October 11, 1982, Cincinnati Bell, Inc., ("Cincinnati Bell") filed notice with this Commission requesting to increase its rates and charges for telephone service rendered to its Kentucky jurisdictional customers to uniform levels with those proposed in a similar rate proceeding in Ohio [Case No. 81-1338-TP-(AIR)] to be effective on November 11, 1982. To determine the reasonableness of the proposed rates and charges, the Commission suspended the proposed rates for 5 months beginning November 11, 1982. On January 24, 1983, Cincinnati Bell filed its revised notice with the Commission which conformed to the reduced rates and charges approved in the final Order of the Ohio Public Utilities Commission.

The revised rates and charges produce additional annual revenues of approximately \$6,505,000. The Commission has accepted the proposed rates and charges herein.

Public hearings were held in this matter on February 1 and 2, 1983, in the Commission's offices in Frankfort, Kentucky. The Consumer Protection Division of the Attorney General's Office ("AG"), Answering Exchange, Inc., the counties of Gallatin, Grant and Pendleton and the cities of Dry Ridge, Warsaw, Falmouth and Williamstown, Kentucky, ("Lower Service Area Intervenors"), were permitted to intervene.

Briefs were filed by all parties on or before March 4, 1983. All additional information requested has been submitted.

Cincinnati Bell is partially owned by American Telephone and Telegraph which owns approximately 31.2 percent of Cincinnati Bell's outstanding common stock and furnishes communication services to portions of a 3-state area which includes Ohio, Indiana and approximately 112,000 customers in Boone, Bracken, Campbell, Gallatin, Grant, Harrison, Owen, Pendleton and Scott counties in Kentucky.

#### ANALYSIS AND DETERMINATION

##### Test Period

Cincinnati Bell proposed and the Commission has accepted the 12-month period ending August 31, 1982, as the test period in this case.

##### RATE UNIFORMITY

The major area served by Cincinnati Bell is the Cincinnati Metropolitan Service Area ("CMSA"), which encompasses portions of Ohio, Indiana and Kentucky. Customers residing within the CMSA can call anywhere within this area for the base

monthly rate, thus making the CMSA one of the largest local calling areas in the nation.

Historically, the Kentucky Commission has adopted the rates set by Ohio as the fair, just and reasonable rates for the Kentucky customers residing in the CMSA. This rate-making approach recognized the CMSA as a single local service calling area and helped to foster area growth, benefiting customers in Kentucky and other jurisdictions.

In implementing rate uniformity within the CMSA, Cincinnati Bell has historically allocated utility plant and expenses to the Kentucky and Ohio jurisdictions on a "revenue split" basis which has been approved by both the Ohio and Kentucky Commissions in previous proceedings. The revenue split method is applicable when the revenue ratios reflect appropriate proportions of total plant and expenses and rates required for service are substantially uniform in each jurisdiction. Rate Uniformity and its revenue split method of separations are consistent with the concept of the CMSA being a single local calling unit rather than the traditional multi-jurisdictional concept.

In Cincinnati Bell's last rate case (Case No. 8174), the Commission departed from the traditional rate uniformity/revenue split separation method and required Cincinnati Bell to adopt the "usage" method of separation in all future rate proceedings

in Kentucky.<sup>1</sup> Cincinnati Bell, the AG and the Lower Service Area Intervenors petitioned for rehearing in that case, and each party requested that the Commission reverse its position on the rate uniformity/revenue split separation method. Cincinnati Bell provided testimony and exhibits during the rehearing process which demonstrated that in future cases before the Commission, revenue requirements and customer rates would increase significantly (\$4.2 million in additional revenue requirements using 1980 investment and expenses) under the application of usage separation procedures. In order to avoid such a result, in its Order entered May 14, 1982, in Case No. 8174, the Commission again adopted the rate uniformity/revenue split separation method.

Cincinnati Bell has customarily filed for rate increases with the Ohio Commission prior to filing with the Kentucky Commission. This affords the Ohio Commission the opportunity to establish the rates for the CMSA which the Kentucky Commission can either accept or reject for the Kentucky jurisdictional portion of the CMSA. Acceptance of the Ohio rates maintains the rate uniformity/revenue split separation method while rejection of the Ohio rates would require this Commission to adopt the usage method of separation. In this proceeding the Commission

---

<sup>1</sup> The Commission's Order in Case No. 8174 entered September 9, 1981.

required Cincinnati Bell to supply financial information for the test period under both separation methods in order to determine the financial impact of each alternative on the Kentucky jurisdictional ratepayers. The AG and the Lower Service Area Intervenors in their respective briefs proposed numerous adjustments to Cincinnati Bell's exhibits filed in this case. The Commission has calculated the additional revenues that would be required under usage separation as if all of the intervenors' adjustments were accepted, and additional adjustments were made by the Commission to be consistent with its rate-making policies. These include the disallowance of the curtailment adjustment, the attrition adjustment, working capital adjustment, 100 percent of the license contract expenses paid to American Telephone and Telegraph (although no intervenor proposed that the entire expense be disallowed), lobbying expenses, charitable contributions, institutional advertising and adjustments reflecting the Commission's established policies addressing concession service revenues, excess deferred taxes and income tax expense from interest synchronization. Using these adjustments and the lowest return on equity from a range in this proceeding of 11.1 to 18 percent, the required revenue under the usage method of separation exceeds the revised revenue increase proposed by Cincinnati Bell by more than \$500,000. For each additional 1 point change in the return on equity the required revenue under the usage method of separation changes by

approximately \$1,000,000. Obviously this is a very conservative estimate of the impact to the Kentucky jurisdiction under usage separation; however, under these strict assumptions it is clearly evident that adherence to the rate uniformity/revenue split concept is in the public interest and is the over-riding consideration in this case. Therefore, without specifically ruling on the findings made by the Ohio Commission, it is the opinion of this Commission that rate uniformity within the CMSA should be approved herein.

#### RATE DESIGN

##### Lower Service Area Rates

In this proceeding, Cincinnati Bell proposed a greater percentage increase in the local calling rates for the areas outside the CMSA, designated as the Lower Service Area ("LSA"), than for the CMSA itself. Of the rate groups for counties outside the CMSA, only rate groups 1 and 3 have customers at the present time. This Commission has not approved rate uniformity for these rate groups in the past, which resulted in lower rates for them than for similar rate groups in Ohio. The rates proposed in this case are uniform with those approved in the last Ohio case; however, since the Kentucky rates were previously much lower, the percentage increases are higher for customers in the LSA than in the CMSA. On a dollar basis, however, the rates for the LSA groups are still substantially lower than the CMSA rates and for similar service in other areas of the state.

In response to the request for information filed January 27, 1983, Cincinnati Bell presented allocated revenue, expense, and asset statements for the LSA which show that under the present rates and the proposed rates, the LSA will not meet its cost of service. The exhibits were not contested by any of the intervenors in cross-examination during the hearings nor in the briefs.

Cincinnati Bell stated, and the Commission concurs, that the proposed local calling rates for the LSA would not result in excessive earnings for the company. Therefore, it is the opinion of the Commission that the rates proposed for the LSA of Cincinnati Bell should be accepted as proposed.

Reduction of Service Offerings

Cincinnati Bell proposed to obsolete and restrict two-party flat rate residence service, two-party message rate residence service and individual line message rate non-residence service as Optional Measured Service ("OMS") is made available in a particular central office area. It further proposed to obsolete and restrict Local Area Service ("LAS") in all exchanges where both LAS and Extended Area Service ("EAS") are offered as OMS is introduced. These services would no longer be available to new applicants for service or to present customers requesting relocation of their service. This was not proposed in Ohio due to the timing in filing the rate case and introduction of measured service.

In support of these proposals, Cincinnati Bell's witness, Mr. R. W. Stropes, District Manager, Tariffs, cited the

unpopularity of two-party service, the inappropriateness of offering two different forms of measured service to non-residence customers, the limited interest in LAS, and administrative advantages to Cincinnati Bell in offering fewer types of services.<sup>2</sup> EAS and OMS, standard or low use, would remain available for new customers and customers requesting relocation of service. Mr. Stropes further testified that revenue would be increased if customers choose the higher priced EAS service and could either increase or decrease if customers choose OMS.<sup>3</sup> No evidence was presented as to the extent of the revenue impact, customer calling patterns, customer interest or reaction to either OMS or EAS.

The Commission is of the opinion that Cincinnati Bell has failed to provide adequate support to justify eliminating these services and that the proposal should be denied. Should Cincinnati Bell choose to pursue this proposal at a later date, it should provide evidence adequate to determine not only the revenue impact but also the benefits which might result for Cincinnati Bell and its customers.

#### Premises Work Charges

Cincinnati Bell proposed to extend time and materials sensitive premises work charges to non-residence, non-complex

---

<sup>2</sup> Prefiled Testimony of R. W. Stropes, pp. 9 and 10; T.E. Vol. II, February 2, 1983, pp. 43-48.

<sup>3</sup> T.E., Vol. II, February 2, 1983, p. 47.

services. This method of charging was approved for residence premises work in Case No. 8174. The Commission believes this proposal is reasonable in that it allows the customer to exercise some control over such charges and allows Cincinnati Bell more direct and complete recovery of such costs from the cost causer. It should, therefore, be approved.

#### Local Conference Calls

Cincinnati Bell proposed to restructure local conference calls to include the originating access line in calculating the charge. This is consistent with the method of charging for toll conference calls and should be approved.

#### Busy Line and Emergency Interrupt Charges

Cincinnati Bell proposed to establish busy line verification and emergency interrupt charges. When the verification and interrupt occur on the same request, only the interrupt charge would apply. No charge would be made for requests to or from emergency agencies, when the operator encounters a trouble condition or has reason to believe trouble exists. The Commission is of the opinion this is a reasonable charge and should be approved.

#### Unrecovered Set Charge

Cincinnati Bell proposed to establish a charge for telephone sets which are not recovered upon total or partial disconnection of service to residence customers and to non-complex, non-residence service. The objectives of the charge are to encourage customer participation in the recovery

effort and to recover the cost of unreturned sets from those responsible for the loss. The proposed charges are based on cost studies and vary depending upon the type of telephone set. The Commission finds the proposal to be reasonable and should be approved.

Wire Tap Investigation Charge

Cincinnati Bell also proposed to establish a wire tap investigation charge when no wire tap or trouble condition is found. The charge would be based on cost incurred for the time spent on the investigation. From January, 1980, through December, 1981, Cincinnati Bell received 166 requests for wire tap investigations. Of these, seven instances of trouble in Cincinnati Bell's equipment were found and only one wire tap.<sup>4</sup> The Commission agrees that these costs should not be borne by the general body of customers. The wire tap investigation charge should be approved.

Call Screening

Cincinnati Bell proposed to establish a call screening service which would be available to institutions such as colleges, universities, hospitals, hotels and motels where facilities permit. This service would enable customers to restrict outgoing toll calls to collect, credit card and third-number calls. The Commission is of the opinion this

---

<sup>4</sup> Prefiled Testimony of R. W. Stropes, p. 12.

service would provide a beneficial option and should be approved.

Flexible Pricing

Cincinnati Bell proposed to institute flexible pricing for its Customer Premises Product Tariff and for some competitive items in the General Exchange, Private Line and Mobile Telephone Tariffs. Flexible pricing would not apply to telephone answering service equipment. Flexible pricing would allow Cincinnati Bell to increase or decrease its rates within a stipulated range of prices with 20 days notice to the Commission. The maximum would be twice the minimum level approved and would apply to monthly rates for leased equipment as well as to items for sale.

Flexible pricing was proposed in Case No. 8174, but was denied because this Commission was not convinced that this pricing procedure would benefit customers or improve Cincinnati Bell's competitive position.

Flexible pricing was approved in Ohio in May, 1981, with the condition that any excess earnings be flowed back to the monopoly customers. Mr. Stropes testified that rates have been adjusted in Ohio in three major instances.<sup>5</sup> The rates for design line telephones were reduced during the Christmas period in 1981; terminal equipment was increased by \$15 million in March, 1981; and rates were recently increased as

---

<sup>5</sup> T.E., Vol. II, February 2, 1983, pp. 34-37.

a result of the Ohio rate case. There have been no excess earnings to date.

The Commission is very much concerned that flexible pricing could result in a customer subscribing to a service at the minimum rate and having that rate fluctuate up to double that amount. Further, as of January 1, 1983, all new terminal equipment was detariffed as a result of the Computer II Inquiry<sup>6</sup> so that, as of the date of this Order, the proposed flexible pricing would be applicable only to embedded equipment.

The Commission allowed Cincinnati Bell to institute a purchase price range for the sale of design line telephones, consisting of a minimum and maximum price, by tariff filing effective November 19, 1973. The only instance cited by Cincinnati Bell as to subscriber benefits is the reduction of prices of design line telephones on one occasion.

For these reasons, the Commission is of the opinion that flexible pricing as proposed by Cincinnati Bell should be denied.

#### COST STUDIES

Cincinnati Bell was directed in the Ohio case to file cost studies with its next general rate proceeding for Customer Operating Center Service ("COCS") and Direct Inward Dialing ("DID"). Questions have been raised in this proceeding

---

<sup>6</sup> FCC Docket No. 2028; 77 FCC 2d 384, May, 1980.

regarding both of these services; therefore, Cincinnati Bell should file copies of these cost studies with its next general rate proceeding before this Commission.

FINDINGS AND ORDERS

After examining the evidence of record and being advised the Commission is of the opinion and finds that:

1. The rates and charges approved by the Public Utilities Commission of Ohio in Case No. 81-1338-TP-(AIR), except as specifically approved or disapproved herein, and in Appendix A are the fair, just and reasonable rates to be charged by Cincinnati Bell for telephone service rendered to its Kentucky jurisdictional customers inside the CMSA and should be approved for service rendered on and after April 1, 1983.
2. The rates and charges proposed by Cincinnati Bell for its Kentucky jurisdictional customers residing outside the CMSA as amended herein and in Appendix A are the fair, just and reasonable rates to be charged for telephone service to these customers and should be approved for service rendered on and after April 1, 1983.
3. The proposal to phase out two-party flat rate residence service, two-party message rate residence service, individual line message rate non-residence service, and local area service should be denied.
4. The extension of time and materials sensitive premises work charges to non-residence, non-complex services

should be approved for service rendered on and after April 1, 1983.

5. The restructuring of local conference call rates to include the originating access line in calculating the charge should be approved for service rendered on and after April 1, 1983.

6. The proposed busy line verification, emergency interrupt, wire tap investigation and unrecovered set charges should be approved for service rendered on and after April 1, 1983.

7. Flexible pricing should be denied.

8. Cincinnati Bell should file cost studies for Customer Operating Center Service and Direct Inward Dialing with its next general rate proceeding.

9. All motions not specifically approved herein should be denied.

IT IS THEREFORE ORDERED that the amended rates and charges set by the Public Utilities Commission of Ohio in Case No. 81-1338-TP-(AIR) for the Cincinnati Metropolitan Service Area of Cincinnati Bell, Inc., except as otherwise specifically approved or disapproved herein, and set out in Appendix A are the fair, just and reasonable rates to be charged by Cincinnati Bell, Inc., for telephone service rendered in the Kentucky jurisdictional portion of the Cincinnati Metropolitan Service Area on and after April 1, 1983.

IT IS FURTHER ORDERED that the rates and charges proposed by Cincinnati Bell, Inc., and in Appendix A for the Kentucky

jurisdictional portion of the areas outside the Cincinnati Metropolitan Service Area are the fair, just and reasonable rates to be charged for telephone service rendered in these areas on and after April 1, 1983.

IT IS FURTHER ORDERED that the obsolescence and restriction of two-party flat rate residence service, two-party message rate residence service, individual line message rate non-residence service, and local area service be and it hereby is denied.

IT IS FURTHER ORDERED that the extension of time and materials sensitive premises work charges to non-residence, non-complex services be and it hereby is approved for such services rendered on and after April 1, 1983.

IT IS FURTHER ORDERED that the restructuring of local conference call rates to include the originating access line in calculating the charge be and it hereby is approved for service rendered on and after April 1, 1983.

IT IS FURTHER ORDERED that the proposed busy line verification, emergency interrupt, wire tap investigation and unrecovered set charges be and they hereby are approved for service rendered on and after April 1, 1983.

IT IS FURTHER ORDERED that flexible pricing, other than that previously approved, be and it hereby is denied.

IT IS FURTHER ORDERED that Cincinnati Bell shall file cost studies for Customer Operating Center Service and Direct Inward Dialing with its next general rate proceeding.

IT IS FURTHER ORDERED that any motions not specifically approved herein be and they hereby are denied.

Done at Frankfort, Kentucky, this 31st day of March, 1983.

GENERAL EXCHANGE TARIFF  
PSCK NO. 3

Description

Section 1  
Explanation of Terms

New

---

**Complex Service**

Denotes all other wiring, equipment, and associated installation work on the customer side of the Standard Network Interface not assigned to Noncomplex Service.

**Individual Line, Rotary**

An individual line grouped with one or more other individual lines of the same class furnished to a customer so that calls to the first number of the grouped lines are automatically routed to the first non-busy line of the lines so grouped, and a busy signal is not given unless all the grouped lines are tested once for busy.

**Noncomplex Service**

Denotes all wiring, equipment, and associated installation work on the customer side of the Standard Network Interface (SNI) exclusive of PBX, Key, Centrex, ESSX, Semi-Public Service, Data or any other equipment associated therewith, regardless of the type exchange access line or channel services\* to which the installation is connected.

\*The Noncomplex Service term is extended to channel services and Foreign Service provided for in this tariff, inasmuch as wiring, equipment, and associated installation work on the customer side of the Standard Network Interface is not associated with PBX, Key, Centrex, ESSX, or Data equipment either at the originating or terminating location.

**Premises**

The building or portion of a building, continuous or contiguous, occupied by the customer either as a place of business or residence.

The provision of PBX station lines and station sets under Plan 1 rates and charges is a discontinued service offering. No new installations will be made. Plan 1 rates and regulations apply only to such lines and sets in service on (#), such lines and sets ordered prior to (#), and to additions of lines and sets on existing installations where Plan 1 rates are in effect for the associated PBX equipment.

(#) the effective date of this Rate Case to be inserted here.

The provision of PBX station lines and station sets under Plan 1 rates and charges is a discontinued service offering. No new installations will be made. Plan 1 rates and regulations apply only to such lines and sets in service on (#), such lines and sets ordered prior to (#), and to additions of lines and sets on existing installations where Plan 1 rates are in effect for the associated PBX equipment.

(#) the effective date of this Rate Case to be inserted here.

Description

**Section 37**  
**Horizon Communication System Under Two-Tier Payment Plan**

**GENERAL**

The provision of HORIZON Systems in this Section is a discontinued service offering. Rates and Regulations apply only to systems in service on, and, to service ordered by customers prior to (# ) and are subject to the following terms and conditions:

- a. Additions may be made on existing installations up to the maximum capacity of the installed HORIZON Communication System, subject to the availability of equipment. Payment can be made under any of the options offered under the Two-Tier Payment Plan.
- b. Customers can have their service moved on a lapse-in-service basis to a new location within the same or to a different tariff jurisdiction provided there are appropriate tariffs allowing such moves.
- c. Discontinued tariffs for the HORIZON Communication System will be considered as existing tariffs when a customer moves between exchanges of a company in different states or between Bell Operating Companies in the same or different states. Appropriate tariffs covering such moves must exist at both locations.
